

Refractory Grade Magnesia Stabilized Zirconia Powder

You can rest assured to buy Nextgen Refractory Grade Magnesia Stabilized Zirconia Powder from our factory. Refractory Grade Magnesia Stabilized Zirconia Powder is made of high –purity MgO and ZrO₂, and shows good refractory performance due to physical properties. Nextgen Advanced Materials supplies Refractory Grade Magnesia

Stabilized Zirconia Powder with high quality and fast delivery, and customized products are available.

Product Description

As the professional manufacture, we would like to provide you Nextgen Ceramic Grade Magnesia Stabilized Zirconia Powder. Nextgen Advanced Materials INC prides itself in serving these markets with a focus on satisfying individual client's needs and requirements. Refractory Grade Magnesia Stabilized Zirconia Powder is a unique product made by high –purity MgO and ZrO₂, which is electric-smelted. The stabilization could be adjusted based on the customer's requirements and it's usually around 70%.

Refractory Grade Magnesia Stabilized Zirconia Powder Specifications		
Type		MSZ-8
Chemical Composition (wt%)	ZrO ₂ +HfO ₂	>94
	MgO	3-4
	SiO ₂	<0.4
	Fe ₂ O ₃	<0.1
	Al ₂ O ₃	<0.4
	TiO ₂	<0.2
Stabilization%		70
